

Alex Kedryk

✉ alexander.kedrik@gmail.com in alex-kedryk 🌐 alkedr

TL;DR: An experienced software engineer looking for ways to make a positive impact on AI safety.

Publications

- Replicated a part of the "Alignment Faking in LLMs" paper and published a [LessWrong post about it](#).

Experience

Apollo Research , Software Engineer • Built or significantly improved several internal tools for running LLM evals.	Sept 2025 – present 7 months
Yandex, YandexGPT training infrastructure , Senior Software Engineer • Sped up model checkpoint uploading during training 2x to make it possible to make checkpoints more often and lose less progress after failures. • Wrote a tool for benchmarking different methods of checkpoint uploading.	Apr 2024 – Aug 2025 1 year 5 months
Yandex, SportTechCV infrastructure , Senior Software Engineer • Designed and implemented infrastructure for a real-time video processing pipeline for tracking player movements on a football field. Python, PostgreSQL, a message queue similar to Kafka, FFmpeg. • Wrote a tool for visualizing the progress of each video chunk in real-time.	Sept 2023 – Apr 2024 8 months
Yandex, VR and 3D reconstruction infrastructure , Senior Software Engineer • Sped up video 3D reconstruction pipeline 4x by finding and fixing infrastructural issues and profiling with Torch profiler. • Researched and tested alternatives to the differentiable 3D-renderer that we were using. Nvdiffrast, Mitsuba 3, Pytorch3d. • Wrote a tool for converting reconstructed animated 3D model back into video for easy viewing.	Nov 2022 – Sept 2023 11 months
Yandex, Self-driving cars simulator infrastructure , Software Engineer • Designed and implemented a task queue service for launching simulator tests that could scale to thousands of workers. Python, PostgreSQL. • Designed, prototyped, and helped implement an inference server cluster that could handle over 12k RPS and tens of GBit/s of incoming traffic. Python, C++, Nvidia Triton Inference Server.	May 2020 – Nov 2022 2 years 7 months
Yandex, Yandex.Market infrastructure , Software Engineer • Worked on a CI/CD web service and a log parsing service. Java, MongoDB.	June 2017 – May 2020 3 years
Yandex, Yandex.Market , Test Automation Engineer	Aug 2013 – June 2017 3 years 11 months

Education

BS Saint-Petersburg National Research University of Information Technologies, Mechanics and Optics (ITMO) , Computer Science	Sept 2011 – June 2015
---	-----------------------

Technologies: Python, C++, PyTorch, Jupyter, Cursor
